COMP2119   Assignment 2

The maximum score is 100, minimum is 33, the average is 87.84. In the last question, more than 50% students said that the assignment is too difficult and they usually spend 10-20 hours to finish the assignment.

There are some common mistakes:

1) In Q2 b), many students calculate a wrong time complexity, which was also happened in Q1 b).

2) In Q5 b), many students misunderstand the meaning of question, and just test whether A[i][j] > 0.

3) In Q9, the prove shouldn't be accepted if you only gives an example to show it meets the condition and the result is right.
